"We've got you covered"

Commercial-Residential-Agricultural

Gabled or hipped, flat ceilings or vaults, attic rooms or no, we can build a truss to meet your needs.

- Custom design to your specifications
- Computer design software ensures all loads and design criteria are met.
- Clear spans of 60feet or more are possible.
- Minimum SP#1chords and SP#2 webs
- Buy direct and save money
- Spans up to 70feet
- Trusses are delivered via roller bed truss trailer to your jobsite ready to install.
- We are proud of the products we sell and we are proud to serve you.

Family owned and operated at the same location since 1995.

Working with prefabricated trusses allows the builder freedom for elaborate ceilings and roof designs with free span abilities not easily accomplished with a *stick framed* roof.

"We strive to give our customers the highest quality product and service"

We provide building components designed by professional office staff utilizing state of the art design software.

The component members are cut to exacting tolerances by experienced saw operators and assembled on our roller gantry system by skilled fabricators.
